## **Designing an Effective TBL Module Workshop**

## ADVANCE ASSIGNMENT FOR APPLICATION EXERCISE

Complete the following tasks AND bring this completed sheet with you to the workshop on Tuesday, September  $20^{th}$ . Once completed, make copies for each of your teammates and consider how you can best present this advance assignment to them given ONLY 5 minutes to do so:

1. Using non-technical/lay terms, please write down one of the most important concepts for a TBL module you would like to develop (Note: it should be a concept that is central enough to your course that if students don't get it, they probably would not deserve credit for passing your course):
2. Next, choose one <b>action-based learning objective</b> that is related to this concept that you feel makes clear to your learners what it is you want for them to be able <b>to do</b> with this knowledge:
3. Finally, create an Application question that you feel will require critical thinking among your learners AND fulfill the learning objective that you have chosen in #2:
